

# Dunlomat®

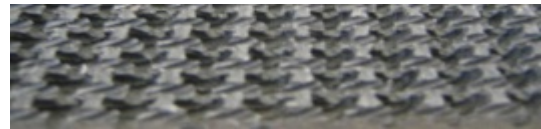

## Tug of war matting

The ultimate in hi-grip rubber matting used by tug of war competitors all around the world.

- Unrivalled grip
- High strength
- Easy to clean
- Long-lasting

Dunlomat is long-lasting and highly versatile industrial rubber matting originally designed for heavy livestock such as cattle and horses. An extremely strong yet flexible carcass of polyester nylon reinforces the high quality abrasion resistant rubber covers.

### TWIF Championships

In recent years its outstanding strength and durability combined with excellent anti-slip properties have made it an increasingly popular choice for Tug of War competitors all over the world. The 'approval rating' of Dunlomat was further endorsed by its use during last years TWIF Championships held in Italy.

### High-grip surface

Dunlomat has a 'Rufftop' surface to provide strong grip and prevent slippage and is available in two thicknesses – 10mm and 6mm in widths up to 2000mm. For competition purposes the 10mm version in a width of 1000mm is stipulated by the TWIF. Lengths and widths can be cut to your specification.

### Easy to install and maintain

Dunlomat is resistant to high-pressure washing, cleaning and disinfecting agents. The smoother surface on the underside makes gluing easy. Fixing instructions can be found on TWIF website:
